## Technical Skills

### Programming Languages:

JavaScript, Python, HTML, CSS/Sass, SQL, C#.

### Frameworks:

Angular, React, Express.js, Flask, Django, Entity Framework, ASP.NET, NextJS

### Database:

MySQL, MongoDB, Cloud FireStore, SQLite, PostgreSQL

### Libraries/Misc:

jQuery, Bootstrap, CSS3, HTML5, Node.js, REST API, Mongoose, .NET Core, Cloud FireStore.

### Other:

Salesforce. Windows OS, Mac OS, Linux, Microsoft Office, Git, VS Code, Jira, Scrum, Sigma, Trello

## Recent Development Projects

### E-Commerce Project | Github:

- A full-stack web app utilizing MongoDB OOP for the database, Express and Node.js for the server, using React and Redux as the frontend framework. Responsive Web App with modern look. Utilized Styled Components to format the app layout, the navigation side bar, and component containers.

### Portfolio React | Github:

- Web app built with Gatsby, React, Anime.js and Styled Components. Utilized Bootstrap 4 to format the app layout, the navigation side bar, and component containers.

### Spotify Profile | Github:

- Web app built with Angular, Node.js, and Express for visualizing personalized Spotify data such as top artists, tracks, recommendations, and audio features. Angular Object-oriented programming within a MVC framework. Angular and AJAX allows for client-side rendering for a quick and responsive user experience. Employed RESTful routing with express/Node.js handling server requests and responses. Utilized Bootstrap 4 to format the app layout, the navigation side bar, and component containers.

### Github Profile | Github:

- Web app built with Python for visualizing personalized Github data such as your repository, your most used languages and the size each of your repositories. A nicer look for your Github Profile with charts. Responsive web app built with Bootstrap and CSS. Technologies used: Chart.js, Isotope, jQuery, JavaScript, Django

### Portfolio Angular | Github:

- Full-stack web app utilizing MongoDB OOP for the database, Express and Node.js for the server, and Angular as the frontend framework. Utilized Bootstrap 4 to format the app layout, the navigation side bar, and component containers. Responsive Web App with modern look, include dark mode for night look. This project is include all my projects and in progress project I am working on.

## Experience

### **Computer Technician @ Mastertronics**

**(November 2019 - February 2020 // Fort Worth, Tx)**

- Received broken computer from amazon and performed diagnostics then communicated the issues to the repair team.

### **Intern @TheTXStudio (October 2020 - February 2021 // Dallas, Tx)**

- Activities and Societies: I Invested +1000 hours in developing coding skill in difference frameworks (Django, Flask, MERN, MEAN Core MVC). Completed multiple independent projects or group projects.
- Made presentations for introducing completed projects or solving algorithm issues.
- Adapted skills and technologies in working remotely during the quarantine period.

### **Full Time Software Engineer @TeammateMe**

**(from March 2021 // Dallas, Tx - August 2021)**

- TeammateMe helps users find and create teams for their course, projects, classes, and extracurricular activities. Also, it helps them gain professional experience and sharpen their teamwork skills. Work with UI/UX Designer.
- Manage GitHub and cloud server. Code review for web developer. Marketing for company.
- Building features, user interface with NextJS for front-end, manage user data, working back-end with NodeJS and PostgreSQL.

### **Front End Developer @Namma (from**

**September 2021 - Present)**

- Through simple features like personalizing loan contracts, setting terms and timelines, and monthly reminders, Namma takes the discomfort out of asking friends and family for financial favors.

### **Full Time Software Engineer @CMINDLLC**

**(from August 2021 // Dallas, Tx - Present)**

- As a full stack developer, I get an opportunity to work with brilliant leaders and fortune 100 clients to help build software products that help organizations innovate in their digital transformation and end-user experience excellence.

## Education

- Front End Software Developer | Certificate, Coding Dojo Bootcamp (year 2020) - Python, Ruby on Rails, MEAN stack development
- River Oaks Academy | High School Graduated (year 2013-2015)
- Mountain View College | Associate of Arts - AA (year 2015-2019)
