Programming Languages:

JavaScript, Python, HTML, CSS/Sass, SQL

Technologies:

Angular, React, Express, MongoDB, Node.js, AJAX, API, Django, jQuery, Bootstrap, AWS, SQLite

Software:

VSCode, Postman(API & server testing)

Recent Development Projects

[E-Commerce Project](#) | [Github](#):

- A full-stack web app utilizing MongoDB OOP for the database, Express and Node.js for the server, using React and Redux as the frontend framework.
- Responsive Web App with modern look.
- Utilized Styled Components to format the app layout, the navigation side bar, and component containers.

[Portfolio React](#) | [Github](#):

- Web app built with Gatsby, React, Anime.js and Styled Components.
- Utilized Bootstrap 4 to format the app layout, the navigation side bar, and component containers.

[Spotify Profile](#) | [Github](#):

- Web app built with Angular, Node.js, and Express for visualizing personalized Spotify data such as top artists, tracks, recommendations, and audio features
- Angular Object-oriented programming within a MVC framework. Angular and AJAX allows for client-side rendering for a quick and responsive user experience Employed RESTful routing with express/Node.js handling server requests and responses
- Utilized Bootstrap 4 to format the app layout, the navigation side bar, and component containers.

[Github Profile](#) | [Github](#):

- Web app built with Python for visualizing personalized Github data such as your repository, your most used languages and the size each of your repositories.
- A nicer look for your Github Profile with charts.
- Responsive web app built with Bootstrap and CSS.
- Technologies used: Chart.js, Isotope, jQuery, JavaScript, Django

[Portfolio Angular](#) | [Github](#):

- Full-stack web app utilizing MongoDB OOP for the database, Express and Node.js for the server, and Angular as the frontend framework.
- Utilized Bootstrap 4 to format the app layout, the navigation side bar, and component containers.
- Responsive Web App with modern look, include dark mode for night look.
- This project is include all my projects and in progress project I am working on.

Relevant Experience

Technician @ Mastertronics

November 2019 - February 2020 // Fort Worth, Tx

- Received broken computer from amazon and performed diagnostics then communicated the issues to the repair team.

Education

Front End Software Developer | Certificate, Coding Dojo Bootcamp

2020

- Python, Ruby on Rails, MEAN stack development

River Oaks Academy | High School Graduated

2013-2015
